OUR STORY

CORDOVA SAFETY PRODUCTS

From our humble beginnings in 1994 as a glove importer working in a garage in Cordova, Tennessee, CORDOVA SAFETY PRODUCTS has grown into a full range, head-to-toe supplier of industrial and retail personal protective equipment (PPE). After years of steady and consistent growth and repeatedly earning a place on Inc. Magazine's list of Fastest Growing Privately Owned Companies in America, we were acquired by Bunzl Distribution. We are now proudly part of their growing North America PPE division dedicated to developing strong brands and delivering profitable growth to our Distributor Partners. Operating out of a 600,000 square-foot warehouse on 39 acres in Memphis, Tennessee, our facility includes warehousing with 32' ceilings, 95 dock doors, and more than 60,000 square-feet of administrative space. From our Memphis headquarters and our distribution center in Rancho Cucamonga, California, we can effectively supply products to our distributors across the US, Mexico and South America. We are Preferred Suppliers to the Affiliated Distributors (AD), Distributor Partners of America (DPA), The United Group (TUG) and STAFDA. At CORDOVA SAFETY PRODUCTS, we pride ourselves on our consistent pursuit of one objective: **customer satisfaction.**

If you are a current CORDOVA customer, we sincerely thank you for your business and we promise to continue to work hard to strengthen our relationship. If you are not yet a customer, we hope this catalog will show you why so many Personal Protective Equipment distributors consider CORDOVA a trusted source for quality products.

HAND PROTECTION GLOVE STANDARDS

GLOVE SIZING

METHOD 1

- Print this sizing gauge at 100% (printer setting must be set to "fit to page" to be accurate).
- Place the side of your index finger next to the red line as shown in the diagram to the right. The number closest to your hand will be the recommended glove size for you.

SIZE

5 XXS

6 XS

7 SM

8 MD

9 LG

10 XL

11 XXL

12 XXXL

METHOD 2

- Using a measuring tape, measure the circumference of your hand just below the knuckles. Refer to the chart below to determine your size.

MEASUREMENT	GLOVE SIZE
5"	XXS
6"	XS
7"	SM
8"	MD
9"	LG
10"	XL
11"	XXL
12"	XXXL

Glove Standards: Two standards are in place to quantify the physical properties of hand protection. ANSI/ISEA 105 is a voluntary US standard that specifies test methods and provides performance ranges for many different properties including chemical resistance, cut resistance, puncture resistance and abrasion resistance. CE/EN 388 is a mandatory European standard that dictates test methods and performance ranges for gloves that provide protection against mechanical risks (abrasion, cut, tear and puncture).

Cut Resistance (ANSI/ISEA 105): To determine cut resistance, a test sample is cut by a straight-edge blade, under load, that moves along a straight path. The sample is cut five times, each under three different loads, and the data is used to determine the required load to cut through the test sample at a distance of 2mm (0.8 inches). Test scores are expressed in Levels and in the number of grams (load). The higher the number of grams, the more cut resistant the material.

ANSI/ISEA CLASSIFICATIONS FOR CUT RESISTANCE

PREVIOUS CLASSIFICATIONS	
LEVEL	WEIGHT (GRAMS)
0	< 200
1	200 - 499
2	500 - 999
3	1000 - 1499
4	1500 - 3499
5	> 3500

NEW CLASSIFICATIONS	
LEVEL	WEIGHT (GRAMS)
A1	≥ 200
A2	≥ 500
A3	≥ 1000
A4	≥ 1500
A5	≥ 2200
A6	≥ 3000
A7	≥ 4000
A8	≥ 5000
A9	≥ 6000

Cut Resistance (CE/EN 388 Testing): The machine used to perform the CE/EN 388 cut resistance test is called a Coup Tester. This machine uses a circular blade, under a fixed load, that moves back and forth across the sample until cut-through is achieved. The cut resistance of the test sample compared to the cut resistance of a standard reference material and a cut index is assigned.

	0	1	2	3	4	5

HAND PROTECTION: HIGH PERFORMANCE GLOVE CHART

HIGH-PERFORMANCE **CUT-RESISTANCE**

High-performance gloves are machine knit and comprised of high-strength yarns that provide increased levels of dexterity and abrasion- and cut-resistance. Most feature coatings to increase durability and grip. They can offer up to four times the cut resistance of traditional leather gloves, along with improved comfort, increased tactile sensitivity, superior liquid resistance and less hand fatigue.

HIGH-PERFORMANCE CUT-RESISTANCE

MACHINIST™

CORDOVA MACHINIST

MACHINIST™ gloves address the need for strength and durability for a variety of applications. Created with a high-performance, 13-gauge HPPE/glass fiber shell, they offer longer life and increased dexterity. All MACHINIST™ gloves provide ANSI level A4 cut protection and are equipped with touchscreen fingertips for convenience in the field.

Applications: Machining, Materials Handling, Assembly, Glass Handling, Construction and Demolition, Oil & Gas.

MACHINIST™ Nitrile Foam | #3734

- Salt & Pepper, HPPE/Glass Fiber Shell
- Black, Foam Nitrile Palm Coating
- PPG-Approved for Glass Handling
- Touchscreen Fingertips

MACHINIST™ Sandy Nitrile | TPR #3734TPR*

- Salt & Pepper, HPPE/Glass Fiber Shell
- Black, Sandy Nitrile Palm Coating
- Nitrile-Reinforced Thumb Crotch
- TPR Protectors & Touchscreen Fingertips

MACHINIST™ Polyurethane | #3734PU**

- Salt & Pepper, HPPE/Glass Fiber Shell
- Gray, Polyurethane Palm Coating
- Touchscreen Fingertips

MACHINIST™ Crinkle Latex | #3734NR††

- Salt & Pepper, HPPE/Glass Fiber Shell
- Black, Crinkle Finish Latex Palm Coating

MACHINIST™ Sandy Nitrile | #3734SN

- Salt & Pepper, HPPE/Glass Fiber Shell
- Black, Sandy Nitrile Palm Coating
- Nitrile-Reinforced Thumb Crotch
- Touchscreen Fingertips

MACHINIST™ ICE | #3734ICE

- Salt & Pepper, HPPE/Glass Fiber Shell
- Full, Smooth Nitrile Coating; Sandy Nitrile Palm
- Two Layer Insulated Construction
- Touchscreen Fingertips

HAND PROTECTION: MACHINIST™ CUT-RESISTANCE

HIGH-PERFORMANCE CUT-RESISTANCE BLACK LABEL™

BLACK LABEL™ gloves are constructed of 13-gauge, high-performance polyethylene (HPPE) yarn. The resulting high-performance shells are cut- and abrasion-resistant with excellent tactile sensitivity

Applications: Metal Fabrication, Injection Molding, Machining Operations, Paper/Pulp Industry.

BLACK LABEL™ Red | #3705**

- Black, HPPE Shell
- TouchScreen Fingertips
- Black, PU Palm Coating

BLACK LABEL™ Gold | #3707

- Black, HPPE/Steel Fiber Shell
- Black, Polymer Polyurethane (PPU) Palm Coating
- Silicone-Free
- TouchScreen Fingertips

WHAT IS PPU?

- Comprised of a Unique Blend of TPU Thermoplastic Polyurethane & Water-Based Polyurethane
- Silicone Free
- Manufactured Without Solvents (DMF)
- Features a Porous Texture That Displaces Liquids & Oils For Excellent Grip
- Creates No Bleed Through - Coating on Outside of Shell Only
- Provides Good Abrasion Resistance
- Safe for Food Contact

HAND PROTECTION: CORDOVA BLACK LABEL™ CUT-RESISTANCE

⚠️ ** WARNING: Cancer - www.P65Warnings.ca.gov

HIGH-PERFORMANCE CUT-RESISTANCE

ION™

ion™

ion™ high-performance gloves provide excellent dexterity and tactility. They are available in a variety of colors and coatings, and they provide up to ANSI A4 level cut resistance.

Applications: High Cut & Abrasion Tasks, Recycling Operations, Metal Fabrication, Plastic Extrusion, Glass Handling.

We protect and beautify the world™

High performance gloves by **CORDOVA SAFETY PRODUCTS** provide excellent dexterity and tactility and are available in a variety of colors, coatings, and cut-resistance levels.

Several **CORDOVA** glove models have been tested by **PPG** (Pittsburgh Plate Glass), a global supplier of paints, coatings, optical products, specialty materials, glass and fiber glass, and are acceptable for use with **PPG Solarban®** and **Sungate®** coated glass products. Behavior testing of the gloves indicated show minimal to no marking when handling glass products.

iON™ | #3701**

HIGH-PERFORMANCE CUT-RESISTANCE MONARCH™ ENGINEERED FIBER

MONARCH™ High Performance gloves and sleeves are made with an engineered fiber that provides outstanding abrasion resistance, cut resistance, and contact heat resistance. Available in a variety of weights, colors, and coatings, they are easy to launder and are unaffected by chlorine bleach and UV light.

Applications: CORDOVA offers a wide range of MONARCH™ products to address a variety of industrial applications. Consult a sales representative for the one that's right for you.

Monarch Properties

- CE Cut Level 5/Minimum ANSI Cut Level A3
- Abrasion & Contact Heat Resistant
- Multiple Shell Weights & Colors
- Multiple Coating Options
- Easy to Launder
- Unaffected by Chlorine Bleach & UV Light
- CE/EN 407: Contact Heat
 - Level 1: 212°F for 15 seconds
 - Level 2: 482°F for 15 seconds

MONARCH Sub Zero™ | #3740††**

- Hi-Vis Green, 7-gauge Engineered Fiber Shell
- Black, Micro-foam, Latex Palm Coating
- Thermal Brushed Interior

MONARCH™ Soft | #3745**

HIGH-PERFORMANCE CUT-RESISTANCE HPPE / STEEL / GLASS

HPPE / Steel / Glass Gloves

High Performance Polyethylene (HPPE) has a tensile strength 15x stronger than steel on an equal weight basis. Hand and arm protection made with HPPE is lightweight, comfortable and abrasion and cut resistant. Tests have shown that gloves made with HPPE fibers have up to 20x the abrasion resistance of gloves made with spun Aramid yarns. HPPE fiber can be combined with glass fiber and/or steel fiber to provide higher cut protection levels.

Applications: High Cut & Abrasion Tasks, Recycling Operations, Metal Fabrication, Plastic Extrusion, Glass Handling.

HAND PROTECTION: HIGH PERFORMANCE ARM PROTECTION

MACHINE-KNIT GLOVES

Machine-knit gloves feature seamless shells that conform to hands for an exact fit and exceptional comfort. They are available with or without a variety of coatings designed to enhance grip. Machine-knit gloves are used in a variety of applications, from automotive maintenance to cleaning and landscaping and much more.

MACHINE-KNIT NITRILE COATED

CONQUEST™

CONQUEST™ gloves feature stretchable seamless shells and conform to hands for an exact fit and exceptional comfort. The flexible Micro-Foam Nitrile/PU coatings provide durability while minimizing hand fatigue. They provide maximum tactile sensitivity for precision assembly and handling of small parts.

Applications: Automotive Assembly and Repair, General Assembly, Electronics Assembly, Food Processing, Janitorial, Metal Fabrication, Painting, Plumbing, HVAC.

MACHINE-KNIT NITRILE COATED

Nitrile Coated Machine-Knit Gloves

Nitrile is an oil-resistant, synthetic rubber that is abrasion, snag, and puncture resistant. Machine-knit nitrile-coated gloves are incredibly durable and offer excellent sense of touch. Foam nitrile coatings are porous to channel oil away from the glove surface for a secure grip in light oil applications.

Applications: Automotive Assembly & Repair, General Assembly, Electronics Assembly, Food Processing, Janitorial, Metal Fabrication, Painting, Plumbing/HVAC

High performance gloves by **CORDOVA SAFETY PRODUCTS** provide excellent dexterity and tactility and are available in a variety of colors, coatings, and cut-resistance levels.

Several **CORDOVA** glove models have been tested by **PPG** (Pittsburgh Plate Glass), a global supplier of paints, coatings, optical products, specialty materials, glass and fiber glass, and are acceptable for use with **PPG** Solarban® and Sungate® coated glass products. Behavior testing of the gloves indicated minimal to no marking when handling glass products.

TOWA
DESIGN AND PERFORMANCE THAT WORK

MicroFinish

The Intelligent Grip

GRIP PERFORMANCE

Towa® MicroFinish® Nitrile gloves provide more than twice the oil grip of ordinary foam nitrile gloves (ASTM D1894 Coefficient of Friction Test).

ABRASION PERFORMANCE

Patented MicroFinish® “double dip” technology provides up to 40% better Abrasion Resistance over typical foam nitrile gloves (U.S. Patent numbers 8,387,176 and 8,302,215).

OIL PERFORMANCE

Two-Layer MicroFinish® Nitrile Coatings are impermeable to oil while standard foam nitrile gloves allow liquids to eventually penetrate and contact the skin.

All **ACTIVEGRIP™** gloves are treated with **SANITIZED®** to prevent bacterial and fungal growth when hands perspire. This treatment extends the life of the gloves by protecting against germs and odors. **SANITIZED®** is a registered trademark of **SANITIZED AG®**.

MACHINE-KNIT POLYURETHANE COATED

Polyurethane Coated Machine-Knit Gloves

Polyurethane (PU) is a petroleum-based thermoplastic elastomer that offers a variety of advantages for use in glove production. PU coatings are resistant to tears, snags, and abrasions and offer unmatched tactile sensitivity. PU is soft, odorless, breathable and free of latex proteins and chemical accelerators.

Applications: Painting, Appliance Manufacturing, Sensitive Assembly Operations, Aerospace, Wiring.

MACHINE-KNIT NATURAL RUBBER LATEX COATED

Natural Rubber Latex-Coated Machine-Knit Gloves

Natural Rubber Latex gloves offer exceptional gripping power and outstanding protection against punctures and abrasion. The seamless, machine-knit shells and high elasticity of the latex coating make these gloves form fitting, flexible, and comfortable. Natural rubber latex may cause allergic reactions in some people.

Applications: Drywall, Roofing, Forestry, Recycling Operations, Construction, Masonry Tile Installation, Shipping & Receiving.

MACHINE-KNIT SHELLS

Machine-Knit Shells

Machine knit shells are form fitting, economical gloves used in light industrial and manufacturing applications. They are constructed of a variety of different yarns, including cotton, polyester, and nylon. Machine knit shells are uncoated and can be used alone or as glove liners. **CORDOVA SAFETY PRODUCTS** offers machine knit gloves in 7-15 gauge with 7-gauge being the heaviest and 15-gauge as the lightest.

Applications: Food Processing, Materials Handling, Work Glove Liners, Janitorial & Sanitation, Warehousing, Agriculture.

OUR SERVICES

Imprinting

Our imprinting services are designed to make you stand out! We can take your logo and imprint it on gloves, eyewear, vests, shirts, sweatshirts, jackets, rainwear, helmets and more.

VendPack

We offer vendpack services on all gloves and sleeves. In addition to imprinting, we can fold, wrap, roll, lay flat and heat seal these products for easy vending machine access.

Sales to Qualified Distributors Only

For over 25 years, our distributor-only sales policy has been the foundation of our trust with customers.

One-Stop PPE Shop

You'll find everything you need to outfit your workers with personal protective equipment for head-to-toe safety. There's no need to shop anywhere else.

Convenient Shipping & Confidential Drop Shipments

We have distribution centers in Memphis, TN, and Rancho Cucamonga, CA, ready to get your products where they need to go.

Reasonable Pre-Paid Minimums

Import & Domestic Private Labeling

Select from our wide range of existing brands or private-label your own.

Specialty Product Development

If we don't have what you need, we can find it. If we can't find it, it doesn't exist, and we can work with you to make it happen.

Generous Sampling Program

See something you like? Request a sample. We'll be happy to send it your way.

Call **800-458-8763** for your custom quotes and more information on any of these services.

LEATHER GLOVES

Leather gloves are the most traditional and popular type of work glove. CORDOVA SAFETY PRODUCTS offers a wide variety of leather gloves including drivers, leather palms, welding gloves and insulated models.

Grades of Leather

Grain Leather is the smooth, exterior side of the animal hide. Grain leather is comfortable, durable, and offers better dexterity and sense of touch.

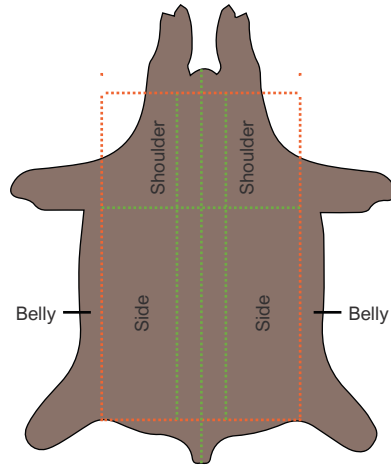

Split Leather is the internal portion of the animal hide. The rougher texture of split leather makes it easy to differentiate from grain leather. Split is the most popular hide used in manufacturing leather palm gloves. It offers abrasion resistance for more heavy-duty applications.

Side Split comes from the rib area of the animal. This part of the hide is the most durable due to the density of the fibers.

Shoulder Split is more economical than Side-Split Leather. The additional movement of the animal in the shoulder area creates less density in the fibers.

Belly Split is the most economical type of Split Leather, but it tends to be thin and lacks consistency and durability.

Thumb Construction

Keystone Thumbs offer the highest range of motion and are the most comfortable. This style offers a wide range of applications and is the most ergonomically correct work glove.

Straight Thumbs are designed for close-fisted work (shoveling, prying, sweeping, etc.). When the fist is closed, the seams are out of the wear area.

Wing Thumbs are designed for open handed work (pushing, pulling, lifting, etc.). The seams are not exposed to wear when the palm is open, thus extending the life of the work glove.

Drivers Features

- 1 Front/Back Leather Coverage
- 2 Shirred Elastic Back
- 3 Keystone Thumb
- 4 Fabric Hem

Types of Leather

Cowhide is comfortable, durable, and abrasion resistant. It is the most commonly used leather in the glove market. Cowhide leather gloves are typically chrome tanned to promote longevity.

Pigskin offers the greatest breathability due to large pores in the hide. Pigskin is ideal for wet applications given its tendency to remain soft after exposure to moisture.

Goatskin is preferred where tactile sensitivity is required. Goatskin provides excellent tensile strength and abrasion resistance. The high lanolin content makes it one of the softest leathers available.

Deerskin is a soft, supple and luxurious hide. It offers excellent dexterity, durability, comfort and high tensile strength.

Leather Palm Features

- 1 Leather Fingertips
- 2 Full Leather Forefinger
- 3 Welted Seams
- 4 Wing Thumb
- 5 Continuous Pull
- 6 Safety Cuff
- 7 Shirred Elastic Back
- 8 Knuckle Strap

CORDOVA
SAFETY PRODUCTS

LEATHER DRIVERS COWHIDE GRAIN & SPLIT

Cowhide Grain & Split Leather Drivers

Grain Leather Drivers are constructed of the smooth exterior side of the animal hide. Split Leather Drivers are constructed of the internal portion of the hide.

HAND PROTECTION: CUT-RESISTANT LEATHER DRIVERS

LEATHER DRIVERS INSULATED

Insulated Leather Drivers

Insulated Leather Drivers provide the added benefit of insulated liners for those cold weather days.

Applications: Agriculture, Construction, General Manufacturing, Masonry Work, Material Handling, Metal Fabrication, Railroad Work, Steel Work, Warehousing.

INSULATED LEATHER DRIVERS

LINING COMPARISON

3M THINSULATE™

The warmest thin insulation on the market. Thinsulate™ has about 1.5x more warmth than down feather lining and absorbs less than 1% of its weight in water, allowing it to retain its insulating ability even in damp conditions.

FLEECE

Brushed 100% Cotton traps air to keep hands warm. Most commonly used glove lining material.

PILE

Soft, synthetic wool (acrylic) provides excellent insulative properties and will not absorb water.

THERMAL

Economical, Waffle Knit. 100% Cotton fabric.

Premium Grain Cowhide | #8255*

- Thinsulate™ Lining
- Shirred Elastic Back

- Full Sock Lining

CHOOSING THE RIGHT WELDING GLOVE

STICK – STICK WELDING REQUIRES GLOVES WITH THICKER INSULATION FOR MORE HEAT PROTECTION DUE TO THE SPARKS, SPATTER & THERMAL HEAT GENERATED BY THE APPLICATION. STICK WELDING GLOVES TYPICALLY HAVE LESS DEXTERITY DUE TO THE ADDITIONAL INSULATION.

MIG – LIGHTER THAN STICK WELDING GLOVES, MIG GLOVES REQUIRE MORE DEXTERITY FOR USE WITH A WELDING GUN.

TIG – TIG WELDING PRODUCES THE LOWEST HEAT AND FLAME OF THESE WELDING APPLICATIONS, SO TIG GLOVES CAN BE THINNER AND MORE DEXTEROUS THAN STICK OR MIG GLOVES.

COTTON GLOVES

Jersey, chore, canvas, and terry cotton gloves are all-purpose, light- to medium-duty gloves. Some of the most common applications for these gloves include farming, gardening, landscaping, painting and roofing.

COTTON GLOVES HI-VISIBILITY

Hi-Visibility Cotton Gloves

Jersey, chore, canvas, and terry cotton gloves are all-purpose, light to medium duty gloves. These high-visibility colors are designed to increase hand protection and visibility.

Applications: Farming, Gardening, Landscaping, Painting, Roofing.

Hi-Vis Cotton | #2800TPR*

HAND PROTECTION: HI-VISIBILITY COTTON

COTTON GLOVES DOUBLE-PALM CANVAS

Double-Palm Canvas Gloves

Cotton canvas gloves offer hand protection for a variety of work applications and are generally preferred over jerseys in more dirty, abrasive environments to keep out grit and grime. Cotton double-palms are constructed with two layers of fabric in the palm. Fabric weights range from 12-18 oz per square yard.

Applications: Agriculture, Assembly, Automotive Assembly & Repair, Construction, Furniture Assembly, General Maintenance & Manufacturing, Masonry Work, Material Handling, Railroad, Warehousing. Heat applications up to 250°F.

Cotton Canvas | #2400

- Nap-Out Poly/Cotton Canvas
- Quilted, Double Palm
- Band Top
- #2410: Natural Knit Wrist

Cotton Canvas | #2420

- Nap-In Poly/Cotton Canvas
- Quilted, Double Palm
- Band Top

Cotton Canvas | #2430

- Nap-In Poly/Cotton Canvas
- Quilted, Double Palm
- Natural Knit Wrist
- #2432: Industry Grade
- #2460: Industry Grade, Red Knit Wrist

Cotton Canvas | #24101

- Nap-In Poly/Cotton Canvas

- #2435CD: Natural Knit Wrist
- #2435SC: Natural Safety Cuff

Cotton Canvas | #2445CD

- Nap-In 100% Cotton, Corded Canvas
- Quilted, Double Palm
- Natural Knit Wrist

HAND PROTECTION: DOUBLE-PALM CANVAS COTTON

COTTON GLOVES COTTON CANVAS & DOTTED

Cotton Canvas & Dotted Gloves

Cotton canvas and dotted gloves offer hand protection for a variety of work application and generally are preferred over jerseys in more dirty, abrasive environments to keep out grit and grime.

Applications: Agriculture, Assembly, Automotive Assembly and Repair, Construction, Furniture Assembly, General Maintenance and Manufacturing, Masonry Work, Material Handling, Railroad, Warehousing.

COTTON GLOVES HOT MILL

Hot Mill Cotton Gloves

Cotton hot mills are constructed with two or three layers of fabric in the palm. The fabric weights range from 22-36 oz per square yard.

Applications: Heat applications up to 400°F.

Cotton Hot Mill | #2500

- Regular Weight, 24 oz Hot Mill
- Quilted Palm, Thumb & Forefinger
- Knuckle Strap
- Band Top Cuff

Cotton Hot Mill | #2505

- Regular Weight, 24 oz Hot Mill
- Quilted Palm, Thumb & Forefinger
- Knuckle Strap
- Gauntlet Cuff

Cotton Hot Mill | #2515

- Heavy Weight Hot Mill
- 3-Ply: Cotton-Burlap-Cotton
- 32 oz, Natural Color Quilted Palm
- Band Top Cuff

Cotton Hot Mill | #2515G

- Heavy Weight Hot Mill
- 3-Ply: Cotton-Burlap-Cotton
- 32 oz, Green Quilted Palm
- Band Top Cuff
- **#2525G:** Gauntlet Cuff

Cotton Hot Mill | #2520

- Heavy Weight Hot Mill
- 3-Ply: Cotton-Cotton-Cotton
- 32 oz, Natural Color Quilted Palm
- Band Top Cuff
- **#2525:** Gauntlet Cuff

Seamless Cotton Hot Mill | #3830

- 2-Ply, Machine Knit Hot Mill
- 7-Gauge, 100% Cotton
- Double-Sided Nitrile Blocks
- Nitrile Thumb Crotch

COTTON GLOVES TERRY

Terry Cotton Gloves

Terry gloves with loop-in are typically preferred when working in higher abrasion applications. Loop-in terry is also used for cold storage or cooler work. Loop-out terry gloves are used in light heat applications. Loop-out terry lets air pass through, cooling down the knit, making it a good heat-absorbing material.

Applications: General Industrial Work & Maintenance, Refrigerated & Cold Storage, Material Handling, Construction, Agriculture, Outdoor Work.

Terry Cotton | #3214I

- Loop-In, 14 oz Cotton Terry
- Natural Color
- Knit Wrist

Terry Cotton | #3214GI

- Loop-In, 14 oz Cotton Terry
- Gray
- Knit Wrist

Terry Cotton | #3218

- Loop-Out, 18 oz Cotton Terry
- Natural Color
- Knit Wrist
- **#3218G**: Gray with Natural Knit Wrist

Terry Cotton | #3224G

- Loop-Out, 24 oz Cotton Terry

- Natural Color
- Knit Wrist
- **#3224/P**: Premium (L)

Terry Cotton Sleeve | #3255

- Loop-Out, 24 oz Cotton Terry
- 15", Natural Color
- Elastic at Both Ends
- **#3258**: 18"

COTTON GLOVES JERSEY & INSPECTOR

Jersey & Inspector Gloves

Inspector gloves are most often used for inspections and sensitive, low-lint applications. Jersey gloves are a common cotton or cotton-blended glove used for a wide variety of applications. They are often equipped with PVC dots for increased gripping strength and are available in different cotton weights and styles.

Applications: Agriculture, Assembly, Automotive Assembly & Repair, Construction, Furniture Assembly, General Maintenance & Manufacturing, Inspections, Masonry, Material Handling, Railroad, Warehousing.

HAND PROTECTION: JERSEY & INSPECTOR COTTON

SUPPORTED & UNSUPPORTED GLOVES

Supported gloves are made with fabric linings that provide support to the protective compounds (nitrile, latex, neoprene, PVC, etc.) that form the outer surface of the glove. Supported gloves are made by dipping or cutting and sewing.

Unsupported gloves are made without supporting fabrics or liners. Ceramic formers with embossed grip patterns are dipped directly into protective polymers.

SUPPORTED & UNSUPPORTED TERMINOLOGY

Definitions

Supported gloves are made with fabric lining that provide "support" to the protective compounds (Nitrile, Latex, Neoprene, PVC, etc.) that form the outer surface of the glove. Supported gloves are made by either "Dipping" or "Cutting and Sewing". Dipping involves placing a knitted or woven fabric liner on a hand former and dipping the former into a protective polymer. Cut and Sewn supported gloves are manufactured by cutting laminated, impregnated or coated fabrics into components, and then stitching them together.

Unsupported gloves are made without supporting fabrics or liners. Ceramic formers with embossed grip patterns are dipped directly into protective polymers. Generally, unsupported gloves are available in palm thicknesses that range from 11-30 mils. A mil is 1/1000th of an inch. Unsupported gloves are sometimes lined with cotton flocking to absorb perspiration and provide comfort. Unsupported gloves provide excellent dexterity and chemical protection.

Disposable gloves offer the most tactile sensitivity of any glove type. Most disposable gloves are designed for single use, light duty applications. Available in both Medical and Food Service grades, most disposable gloves have palm thicknesses that range from 4-15 mils. Disposable gloves are normally powdered, chlorinated or polymer coated to allow for easy donning. Latex, Nitrile and Vinyl are the most prevalent compounds used to produce disposable gloves.

Butyl Gloves are made in the USA by Guardian Manufacturing and offer unmatched protection against hazardous chemicals encountered in agriculture, chemical manufacturing, Hazmat operations, first response, ship building, and aircraft manufacturing. The dense molecular structure of butyl rubber is the key to its superior chemical impermeability. We offer butyl rubber gloves in 5, 7, 14 and 25 mil thicknesses to allow for dexterity in a variety of application.

Coatings

Natural Rubber Latex is the milky sap of the Hevea Rubber Tree. Once extracted, the sap is centrifuged and processed to achieve optimal physical properties. Natural latex transforms from a liquid state to a solid state when exposed to heat (vulcanization) during the curing process. Natural Rubber generally withstands all liquids that mix with water, such as alcohols and acetones. Some individuals may experience allergic reactions to proteins found in Natural Rubber.

Nitrile, or Acrylonitrile Butadiene Rubber, is a synthetic rubber developed as a substitute for Natural Rubber. It offers good protection against organic solvents, oils, bases and animal fats. It also provides excellent resistance to abrasion, snag, punctures, and cuts. Nitrile is an extremely versatile synthetic rubber, and it is used to produce a wide range of Disposable, Unsupported, Supported and Coated gloves.

Neoprene, or Chloroprene, was developed in the 1930's by DuPont®. Neoprene was the first man-made rubber. It provides excellent chemical protection, and it is impermeable to gases, vapors, and moisture. Neoprene does not provide quite the same abrasion resistance as Nitrile; however, it does offer good cut protection and resembles Natural Rubber in feel and flexibility. Neoprene resists degradation from sun, ozone and weather, and is used to make a variety of products including conveyor belts, hoses, wet suits and gaskets.

Polyvinyl Chloride, or PVC Vinyl Plastic, is the thermoplastic polymer of Vinyl and Chloride. It is produced by combing resins and plasticizers, then fusing them through a heat process. The wear, flexibility and chemical resistance of PVC can be controlled by carefully regulating the compounding of these two ingredients. Polyvinyl Chloride provides protection against caustics, acids, bases, detergents, and solvents.

Polyurethane, or PU, is a petroleum based thermoplastic elastomer with a cross-linked molecular structure. Polyurethane's molecular structure makes it incredibly tough and yet, surprisingly soft, flexible and comfortable. PU contains no Latex proteins or chemical accelerators, both of which can cause allergic reactions. PU is odorless and it resists degradation by ozone, fuels, oils, acids and many solvents.

GRADING KEY ● Excellent ● Good ● Fair ● Poor ● Not Recommended

! *WARNING: CORDOVA gloves have not been individually tested against the chemicals in this chart. We assume no responsibility for the suitability of a user's selection for a specific application. Failure by the user to select the correct glove material could result in injury, sickness, or death. This chart is provided only as a general guide for the suitability of various unsupported glove materials against commonly used chemicals. The data provided is based on published information, including OSHA 3151-12R-2001, and is believed to be accurate; however, we cannot guarantee its accuracy. Chemical resistance is affected by many factors including temperature, concentration, glove thickness, glove durability, and chemical exposure time. It is solely the responsibility of the user to determine the risk associate with a particular application and to make the appropriate choice for protection against such risk. Gloves referenced as "fair", "poor", or "not recommended" should never be used. It is always best to perform a trial by exposing gloves referenced as "good" or "excellent" to the chemical before using. Check for chemical penetration, discoloration, cracking, or swelling. Discontinue use and consider another glove material should any degradation of the glove material occur.

HAND PROTECTION: SUPPORTED & UNSUPPORTED DEGRADATION CHART

SUPPORTED NITRILE

BRAWLER™

All Brawler™, Brawler II™, and Brawler Lite™ premium nitrile coated gloves feature tough, heavy-duty nitrile coatings that are abrasion, snag, and oil-resistant. They are treated with Sanitized® to prevent bacterial and fungal growth when hands perspire, extending the life of the glove.

Applications: Abrasive Material Handling, Lumber Industry, Masonry, Recycling Operations, Machining, Sheet & Scrap Metal Handling, & Degreasing.

All **BRAWLER™** gloves are treated with **SANITIZED®** to prevent bacterial and fungal growth when hands perspire. This treatment extends the life of the gloves by protecting against germs and odors. **SANITIZED®** is a registered trademark of **SANITIZED AG®**.

- Attached Hood with Drawstring
- Storm Fly Front + Zipper
- Bib-Style Pants + Suspenders

SUPPORTED INSULATED PVC

Supported Insulated PVC Gloves

Insulated PVC gloves feature cold-resistant formulations, flexible PVC, and insulated linings. PVC provides protection against caustics, acids, bases, detergents and solvents. It offers excellent resistance to most acids, oils, animal fats, caustics, petroleum hydrocarbons, and alcohols.

Applications: Cold Weather Applications.

UNSUPPORTED BUTYL

Unsupported Butyl Gloves

Butyl gloves provide outstanding chemical permeation protection against a wide range of hazardous chemicals. Originally developed for the military, Butyl gloves have become the hand protection of choice for challenging chemical applications.

Applications: Chemical Industry Uses, Automotive, General, Manufacturing, Military/ Government, Aerospace, First Responders, Hazmat.

Unsupported Butyl

- 14-Inch Length
- 5 mil-25mil Thickness
- Smooth or Rough Finish
- Re-usable
- Rolled Cuff
- Made In the USA

ITEM NO.	MIL	COLOR	FINISH
BTL5	5 MIL	BLACK	SMOOTH
BTL7	7 MIL	BLACK	SMOOTH
BTL14	14 MIL	BLACK	SMOOTH
BTL14R	14 MIL	BLACK	ROUGH
BTL25	25 MIL	BLACK	SMOOTH
BTL25R	25 MIL	BLACK	ROUGH

CHEMICAL PROTECTION

Butyl gloves protect against:

- Skydrol
- Sulfuric Acid
- Alodine (chromic Acid)
- Ketones (Acetone, MEK, MIBK)
- Esters
- Acids
- Stripping Agents

HAND PROTECTION: UNSUPPORTED BUTYL

UNSUPPORTED NEOPRENE

Unsupported Neoprene Gloves

Neoprene unsupported gloves are impermeable to gases, vapors, and moisture. They offer similar flexibility as natural rubber latex and maintain their physical properties in temperatures ranging from 25-300°F.

Applications: See Chemical Permeation Chart for glove application and uses.

HAND PROTECTION: UNSUPPORTED NEOPRENE

CHEMICAL PERMEATION CHART

The 3-digit codes below refers to the code letters of 3 chemicals (from a list of 12 standard defined chemicals), for which a breakthrough time of at least 30 minutes has been obtained.

CODE LETTER	CHEMICAL	CAS NUMBER	CLASS
A	Methanol	67-56-1	Primary Alcohol
B	Acetone	67-64-1	Ketone
C	Acetonitrile	75-05-8	Nitrile Compound
D	Dichloromethane	75-09-2	Chlorinated Paraffin
E	Carbone Disulphide	75-15-0	Sulphur containing organic compound
F	Toluene	108-88-3	Aromatic Hydrocarbon
G	Diethylamine	109-89-7	Amine
H	Tetrahydrofurane	109-99-9	Heterocyclic and ether compound
I	Ethyl Acetate	141-78-6	Ester
J	n-Heptane	142-82-5	Saturated Hydrocarbon
K	Sodium Hydroxide 40%	1310-73-2	Inorganic Base
L	Sulphuric Acid 96%	7664-93-9	Inorganic Mineral Acid

Unsupported Neoprene | #4300††

- Premium Neoprene on Latex
- Flock-Lined, Embossed Grip
- 28 mil, 12" Length
- Straight Cuff

Unsupported Neoprene | #4340††

- Premium, Orange Neoprene/Latex Blend
- Flock-Lined, Embossed Grip
- 28 mil, 12" Length
- Straight Cuff

Unsupported Neoprene | #4360/S

- Premium 100% Neoprene
- Flock-Lined, Embossed Grip
- 30 mil, 12" Length
- Straight Cuff

! †† WARNING: This product contains Natural Rubber Latex which may cause an allergic reaction in some individuals

UNSUPPORTED NITRILE

Unsupported Nitrile Gloves

Unsupported gloves are made without supporting fabrics or liners. Ceramic formers with embossed grip patterns are dipped directly into protective polymers. Generally, unsupported gloves are available in palm thickness that ranges from 11-30 mil. Nitrile unsupported gloves provide excellent snag and abrasion resistance. They resist solvents, oils, and animal fats.

Applications: Food Processing, Petrochemical, Refining Operations, Material Handling, Chemical Processing, Automotive & Aircraft Assembly, Printing, Painting, Furniture Manufacturing.

Unsupported Nitrile | #4410

- Premium, Unlined Nitrile
- Diamond-Embossed Grip
- 11 mil, 13" Length
- **#4430**: Standard, 11 mil (S-2XL)

Unsupported Nitrile | #4510

- Premium, Unlined Nitrile
- Diamond-Embossed Grip
- 15 mil, 13" Length

HAND PROTECTION: UNSUPPORTED NITRILE

UNSUPPORTED LATEX

Unsupported Latex Gloves

Unsupported latex gloves resist most water-based chemicals. They provide excellent elasticity and tactile sensitivity. Unsupported gloves are made with no supporting fabrics or liners. Ceramic formers with embossed grip patterns are dipped directly into protective polymers. Generally, unsupported gloves are available in palm thicknesses that range from 11 to 30 mil.

Unsupported Latex | #4210N^{††}

DISPOSABLE GLOVES

Disposable gloves offer the most tactile sensitivity of any glove. The majority of disposable gloves are designed for single-use, light-duty applications, such as automotive service, food service, industrial and medical applications and general hygiene use.

DISPOSABLE NITRILE

Disposable Nitrile Gloves

Nitrile is a synthetic rubber developed as a substitute to natural rubber. It protects against organic solvents, oils, bases, and animal fats. It is used to produce a wide range of disposable, unsupported, supported, and coated gloves. Disposable gloves offer the most tactile sensitivity of any glove. Most disposable gloves are designed for single use, light duty applications.

HAND PROTECTION: DISPOSABLE NITRILE

Nitri-Cor Platinum™ | #4091

- Industrial/Food Service Grade
- Blue, Textured Finish
- 8-mil, Powdered
- Case Pack: 50/Box x 20

- Industrial/Food Service Grade
- Ultra-Blue, Textured Finish
- 2-mil, Powder Free
- Case Pack: 300/Box x 10

Food Service & Industrial Grade

Disposable Food Service and Industrial grade Nitrile gloves are ideal for such applications as:

- General Assembly
- Automotive Assembly & Repair
- Chemical Handling
- Electronics Assembly
- Food Processing
- Janitorial Work
- Painting
- Printing

Nitri-Cor Eclipse™ | #4082B

- Medical Grade
- Black, Textured Finish
- 6-mil, Powder Free
- Case Pack: 100/Box x 10

Nitri-Cor Eclipse™ | #4083B

- Industrial/Food Service Grade
- Black, Textured Finish
- 4-mil, Powder Free
- Case Pack: 100/Box x 10

Nitri-Cor Eclipse™ | #4084B

- Medical Grade
- Black, Textured Finish
- 4-mil, Powder Free
- Case Pack: 100/Box x 10

Nitri-Cor Silver™ | #4085

- Medical Grade
- Blue, Textured Finish
- 4-mil, Powder Free
- Case Pack: 100/Box x 10

Medical Grade

Disposable Medical Grade Nitrile gloves are ideal for such applications as:

- Patient Exams
- First Aid
- Dentistry
- Laboratories
- Pharmaceutical Manufacturing
- Home Health Care

DISPOSABLE LATEX

Disposable Latex Gloves

Latex gloves provide the ultimate tactile sensitivity. Natural Latex is derived from the milky sap of the Hevea Rubber Tree. Once extracted, the sap is centrifuged and processed, transforming from a liquid to a solid state when exposed to heat during the curing process. Natural rubber generally withstands all liquids that mix with water, like alcohols and acetones. Some people may experience allergic reactions to the proteins found in the natural rubber. Latex is safe for food contact.

Applications: Food Preparation, Cleaning, Painting, & General Maintenance.

DISPOSABLE VINYL

Disposable Vinyl Gloves

Vinyl is a man-made substance made from ethylene (found in crude oil) and chlorine (found in regular salt). Vinyl is strong, durable, low-cost, and resistant to moisture. It is also a recyclable material.

Applications: Aerospace, Automotive Repair, Chemical Handling, Electronics Assembly, Food Processing & Service, Furniture Assembly, Inspection, Janitorial, Painting, Pharmaceutical, Plumbing, HVAC, Steel Work.

Vinyl/Nitrile Blend | #4045

CE

OGRE
CORDOVA SAFETY PRODUCTS

BODY PROTECTION ANSI/ISEA STANDARDS

Types: High Visibility Safety Apparel (HVSA) types are designated by the work environment in which the wearer is performing a task. Apparel includes, but is not limited to, clothing such as vests, jackets, pants, shirts, rain wear and coveralls.

Type O (Off-road): Type O HVSA provides daytime and nighttime visual conspicuity enhancement for workers in occupational environments which pose struck-by hazards from moving vehicles, equipment and machinery, but which will not include exposure to traffic on public access roadway rights-of-way or roadway temporary traffic control (TTC) zones.

Type R (Roadway): Type R HVSA provides daytime and nighttime visual conspicuity enhancement for workers in occupational environments which include exposure to traffic (vehicles using the roadway for purposes of travel) from public access roadway rights-of-way, or roadway temporary traffic control (TTC) zones or from work vehicles and construction equipment within a roadway temporary traffic control (TTC) zone.

Performance Classes: Performance Classes present within each type of HVSA (High Visibility Safety Apparel) are specified in terms of the minimum area of high-visibility materials to be incorporated. Performance Classes provide a range of design options corresponding with the needs of the user in the expected risk environment.

Performance Class 1 (Type O): Provides the minimum amount of high-visibility materials required to differentiate the wearer visually from non-complex work environments, in scenarios in which the struck-by hazards will not be approaching at roadway speeds, and therefore operative detection and identification distances in the work environment can be shorter than in other situations without compromising safety.

Performance Class 2 (Type R): Provides for the use of additional amounts of high-visibility materials, which may allow design opportunities to define the human form more effectively. Performance Class 2 HVSA have the potential to provide longer detection and identification distances, and increased conspicuity performance compared to Performance Class 1 HVSA. **NOTE: Performance Class 2 HVSA is considered a minimum practice for HVSA in roadway rights-of-way and temporary traffic control (TTC) zones.**

Performance Class 3 (Type R): Offers the greater visibility to the wearer in both complex backgrounds and through a full range of body movements by mandatory placement of background, retroreflective and combined-performance materials on sleeves and pant legs (if present). Regardless of the area of materials used, a sleeveless garment or vest alone shall not be considered Performance Class 3.

Supplemental Class E: Pants, bib overalls, shorts, and gaiters shall be designated Class E. Class E items shall not be worn alone for the purposes of meeting HVSA PPE requirements. When a Class E item is worn with Performance Class 2 or Class 3, the overall classification shall be Performance Class 3.

Minimum Areas of Visible Materials

Garment Type	Performance Class	Background Material	Retroreflective or combined Performance Materials	Minimum Width Retroreflective Material
Type O Off-road and Non-Roadway Use	Class 1	0.14 m ² (217 in ²)	0.10 m ² (155 in ²)	25 mm (1 in.)
Type R Roadway and Temporary Traffic Control Zones	Class 2	0.50 m ² (775 in ²)	0.13 m ² (201 in ²)	25 mm (1 in.) 35 mm (1.38 in.)
	Class 3	0.80 m ² (1240 in ²)	0.20 m ² (310 in ²)	25 mm (1 in.) 50 mm (2 in.)
Supplemental Items Pants, Overalls, Shorts, Rain Pants and Gaiters	Class E	0.30 m ² (465 in ²)	0.07 m ² (109 in ²)	25 mm (1 in.) 50 mm (2 in.)

HIGH-VISIBILITY SAFETY VESTS

CORDOVA SAFETY PRODUCTS provides a wide selection of hi-vis safety vests, jackets, and shirts to keep you safe and seen inside and out, no matter the weather.

MODACRYLIC FR VESTS

Modacrylic Safety Vests

Modacrylic fabrics are inherently flame resistant. Safety vests made with Modacrylic fabric offer high visibility and protection against arc flash.

VMFR201

VMFRZ201

COR-BRITE™ Modacrylic Vests

- FR Hook & Loop (#VMFR201) or Zipper Closure (#VMFRZ201)

FLAME RESISTANT TERMINOLOGY

NFPA 70E National Fire Protection Association Standard for Electrical Safety in the workplace.

ASTM F1506 Standard Performance Specification for Flame Resistant Textile Materials for Wearing Apparel for Use by Electrical Workers Exposed to Momentary Electric Arc & Related Thermal Hazards.

ARC FLASH An undesired electric discharge where a flashover of electric current leaves its intended path and through the air between conductors or from a conductor to a ground. The results are often violent and when a human is in close proximity to the arc flash, serious injury and even death can occur.

ARC RATING The value attributed to materials that describes their performance to exposure to an electrical arc discharge. The arc rating is expressed in cal/cm² and is derived from the determined value of the arc thermal performance value (ATPV).

HAZARD RISK CATEGORY (HRC)

Hazard/Risk categories specified under NFPA 70E. The HRC is used to determine the necessary arc rating of a garment worn during a given job task.

SELF-EXTINGUISHING VESTS

Self-Extinguishing Vests

Self-extinguishing vests are polyester vests that are treated with a flame retardant. These vests provide protection against incidental sparks. These garments are not flame resistant as defined by ANSI/ISEA 107-2015 Section 105. Not designed for Arc Flash.

Applications: For use with the likelihood of sparks, incidental contact with hot machinery, and non-arc flash applications.

COR-BRITE™ Self-Extinguishing Vests | #VB3200FR* (Orange) and #VB3201FR* (Lime)

- ① 5 Point Breakaway Design
- ② 2-Tone Reflective Tape
- ③ Clear Badge Holder
- ④ Dual Mic Tabs
- ⑤ 4 Pockets: 2 Outside Chest, 2 Inside Lower

Self-Extinguishing Vest

- Orange (#VB230PFR*) or Lime (#VB231PFR*)
- NFPA 701, Hook & Loop Closure, 2" Silver Reflective Tape
- 3 Pockets: 1 Inside Lower, 1 Outside Chest, 1 Outside Lower
- 3-Division Pen Pocket & Mic Tab

Hook & Loop Positioned at Front of Shoulder for added Support and Easy Access

Self-Extinguishing Vest | #VB221PFR*

- NFPA 701, Hook & Loop Closure
- 5-PT Breakaway Design
- 2" Reflective Tape
- 2 Pockets: 1 Outside Lower, 1 Inside Chest Pocket with Hook & Loop Closure

HI-VISIBILITY SURVEYOR'S VESTS

Type R, Class 2 Surveyor's Vests

Surveyor's vests offer convenient features for use in the field, including multiple pockets for equipment, mic tabs, and clear badge holders.

COR-BRITE™ Heavy-Duty Surveyor Vests | #VS295 (Orange) and #VS296 (Lime)

- 1 Orange Mesh Polyester with Gray Nylon Trim
- 2 Non-Conductive Snap Closures
- 3 Large Back Pouch for Tablet or Surveyor's Plans
- 4 Dual Mic Tabs, Carabiner Holes
- 5 D-Ring Pass Through
- 6 Clear Badge Holder
- 7 8 Pockets: 4 Outside 4 Inside

- Orange (#V220) or Lime (#V221) Solid Fabric
- Hook & Loop Closure
- 2" Silver Reflective Tape
- No Pockets

COR-BRITE™ Expandable Vests

- Orange (#VS290P) or Lime (#VS291P) Polyester Mesh Fabric
- 2-Tone Contrasting 4.5" Reflective Tape
- Pockets: 5 Outside, 2 Inside
- Dual Mic Tabs & Clear Badge Holder
- Sizes: S/XL, 2XL/5XL

COR-BRITE™ Mesh Vest | #VX211P

- Lime Polyester Mesh Fabric
- X-Pattern on Back, Hook & Loop Closure
- Canadian Z96 Compliant
- Pockets: 1 Chest, 1 Waist

COR-BRITE™ Mesh Vest | #V241P

- Lime Polyester Mesh Fabric
- Hook & Loop Closure
- 2" Silver Reflective Tape
- Pockets: 1 Inside Lower

COR-BRITE™ 5-Point Breakaway Vests

- Orange (#VB230P) or Lime (#VB231P) Polyester Mesh Fabric
- Hook & Loop Closure, 2" Reflective Tape
- Pockets: 1 Outside Lower, 1 Inside Lower with Hook & Loop Closure

COR-BRITE™ Class 3 Vests

- Orange (#V3000) or Lime (#V3001) Polyester Mesh Fabric
- Non-Conductive Zipper Closure, 2" Reflective Tape
- Pockets: 2 Inside Lower, 1 Outside Lower, 1 Outside Chest with 4-Division Pen Pocket (all pockets include Hook & Loop Closures)

HI-VISIBILITY NON-RATED SAFETY VESTS

Non-Rated Safety Vests

CORDOVA SAFETY PRODUCTS non-rated safety vests make sure you are safe and seen. These vest are for general-purpose use including event management, parking lot attendants, and crossing guards.

Non-Rated Safety Vests

- Orange (#V100*) or Lime (#V101*) Polyester Mesh Fabric
- Hook & Loop Closure
- No Reflective Tape
- One Size Fits Most

Non-Rated Safety Vests

- Orange (#V110L*) or Lime (#V111W*) Polyester Mesh Fabric
- Hook & Loop Closure
- 1" Reflective Gloss Tape
- One Size Fits Most

Non-Rated Safety Vests

- Orange (#V120L*) or Lime (#V121W*) Polyester Mesh Fabric

HIGH-VISIBILITY **SAFETY APPAREL**

CORDOVA SAFETY PRODUCTS provides a wide selection of hi-vis safety jackets, t-shirts, and pants to keep you safe and seen inside and out, no matter the weather.

HI-VISIBILITY T-SHIRTS

Comfort Stretch Shirts

CORDOVA SAFETY PRODUCTS provides a variety of hi-vis t-shirts to be sure you are safe and seen. Our COR-BRITE™ line of hi-vis apparel features both Comfort-Stretch fabric and Birdseye mesh fabric. Comfort-Stretch is an ultra-light polyester/spandex blend and is equipped with segmented reflective tape. The Birdseye mesh fabric provides moisture-wicking that draws moisture away from the skin to accelerate cooling. It is available with or without reflective tape.

DISPOSABLE PROTECTION

CORDOVA SAFETY PRODUCTS supplies a variety of disposable protection apparel for applications such as asbestos and lead abatement, environmental cleanups, food processing, inspection and more.

DISPOSABLE PROTECTION DEFENDER™

DEFENDER™ Disposable Products

CORDOVA SAFETY PRODUCTS-brand DEFENDER™ premium, protective clothing is constructed of tough, composite fabric that combines breathable microporous film and soft non-woven polyolefin. It provides an effective barrier against particulates, aerosols, and liquids while maintaining comfort. It is designed for work environments where hazardous and non-hazardous liquid and dry particulate contaminants may be present.

Applications: Agriculture, Mold Remediation, Asbestos & Lead Abatement, Laboratories, Environmental Cleanups, Pesticides, Food Processing, Sanitation Engineering, Inspection, Pharmaceutical Manufacturing.

MICROPOROUS MATERIAL

DEFENDER™ Features

- Serged Seams

BODY PROTECTION: DEFENDER™ DISPOSABLE PRODUCTS

DISPOSABLE PROTECTION DEFENDER II™

DEFENDER II™ & DEFENDER FR™ Disposable Products

DEFENDER II™ premium protective clothing is a lighter, cooler version of the original. DEFENDER FR™ disposable coveralls are designed to prolong the life of primary FR garments by providing a secondary level of protection against sparks, splashes, and spills. They are chemically treated to meet the flame resistance requirements of NFPA 701-2010 and provide protection in work environments where hazardous and non-hazardous liquids and dry particulate contaminants may be present.

Applications: (DEFENDER II™) Agriculture, Mold Remediation, Asbestos & Lead Abatement, Laboratories, Environmental Cleanups, Pesticides, Food Processing, Sanitation Engineering, Inspection, Pharmaceutical Manufacturing. (DEFENDER FR™) Refineries, Mining, Utilities, Welding, Plant Visitors, Laboratories, Steel Mills, Grinding Foundries

DISPOSABLE PROTECTION C-MAX™

C-MAX™ Disposable Coveralls

CORDOVA'S C-MAX™ protective coveralls are made with durable, breathable SMS fabric. SMS is composed of three layers of polypropylene material. One layer of melt-blown polypropylene is sandwiched between two layers of spun-bonded polypropylene to provide outstanding protection against splashes and particulates. This unique fabric give the C-MAX™ coverall excellent abrasion and liquid resistance, making them suitable for work environments where hazardous and non-hazardous liquid and dry particulate contaminants may be present.

Applications: Asbestos & Lead Abatement, Food Processing, Spray Painting, Tank Cleaning, Mold Remediation.

THE EYEWEAR YOU NEED DEPENDS ON THE HAZARDS YOU FACE¹

According to the U.S. Bureau of Labor Statistics, about 20,000 eye injuries occur in the workplace each year.

When choosing eyewear, wear:

- Safety glasses with side protection (side shields) if you work around particles, flying objects or dust;
- Goggles if you handle chemicals;
- Specially designed safety glasses, goggles, face shields or helmets if you work near hazardous radiation, such as welding, lasers or fiber optics;

¹ <https://www.aaof.org/eye-health/tips-prevention/injuries-work>

EYE PROTECTION OPTICOR™

CORDOVA'S Opticor™ safety glasses offer a frameless design with nylon temples. They feature a one-piece lens with integrated side shields and scratch-resistant polycarbonate lens. They also provide comfortable thermo-plastic temples and nose piece. They meet ANSI Z87.1+ Standards and provide 99.9% UV protection. All safety glasses are safe for food contact.

RESPIRATORY PROTECTION RESPIRATORS, MASKS & SHIELDS

Respirators and General Hygiene Masks

CORODVA SAFETY PRODUCTS has the respiratory protection products you need to stay safe. This includes valved & non-valved NIOSH-approved face masks, KNX95 face masks, and masks for general hygiene use, such as ear loop and dust masks. NIOSH-approved N95 Respirators provide a minimum of 95% filtration efficiency against solid and liquid aerosols that do not contain oils.

NOTES

NOTES

OUR SERVICES

Imprinting

Our imprinting services are designed to make you stand out! We can take your logo and imprint it on gloves, eyewear, vests, shirts, sweatshirts, jackets, rainwear, helmets and more.

VendPack

We offer vendpack services on all gloves and sleeves. In addition to imprinting, we can fold, wrap, roll, lay flat and heat seal these products for easy vending machine access.

Sales to Qualified Distributors Only

For 25 years, our distributor-only sales policy has been the foundation of our trust with customers.

One-Stop PPE Shop

You'll find everything you need to outfit your workers with personal protective equipment for head-to-toe safety. There's no need to shop anywhere else.

Convenient Shipping & Confidential Drop Shipments

We have distribution centers in Memphis, TN, and Rancho Cucamonga, CA, ready to get your products where they need to go.

Reasonable Pre-Paid Minimums

Import & Domestic Private Labeling

Select from our wide range of existing brands or private-label your own.

Specialty Product Development

If we don't have what you need, we can find it. If we can't find it, it doesn't exist, and we can work with you to make it happen.

Generous Sampling Program

See something you like? Request a sample. We'll be happy to send it your way.

Satisfaction Guaranteed

If any of our products do not meet or exceed the standard of the originally sampled item, we invite you to return it for a full refund.

Call **800-458-8763** for your custom quotes and more information on any of these services.

Email: **sales@cordovaisc.com**
